Introduction to Work with the Socio-Economic Panel (SOEP)

International Workshop on September 17 and 18, 2013, at the University of Bamberg

Instructors	Marco Giesselmann (DIW Berlin) Daniel Schnitzlein (DIW Berlin)
Organizer	Bamberg Graduate School of Social Sciences (BAGSS)
Participants	20-25
Registration	BAGSS members register by sending a mail to marc.scheibner@uni-bamberg.de No fees are for this workshop charged
Room	RZ/01.02
Description	<p>The workshop offers an introduction to the Socio-Economic Panel (SOEP). The SOEP is a survey of the population of Germany that has been conducted annually since 1984 and addresses topics such as household composition, employment and family biography, income trajectories, health, education, life satisfaction, and personality. Working with a complex longitudinal dataset like the SOEP offers numerous possibilities but also requires specialized skills.</p> <p>The workshop offers participants the opportunity to gain a well-grounded general understanding of how to work with the SOEP data. In addition to providing an overview of the structure and possibilities for analysis offered by the SOEP, the workshop will focus on questions about the sample and weighting, international comparisons data and intergenerational analyses on the basis of the SOEP data.</p> <p>The lectures will be accompanied by tutorials dealing with the use of the SOEP information systems. The focus of this training will be on equipping users with skills in the preparation of datasets for analysis. The software used in the workshop will be Stata. Basic knowledge of Stata is required.</p>
